EXPERIENCE

Leftover Love Inc

Data Analyst

Hyattsville, MD

Jan 2026 - Present

- Analyzed 1,000+ operational records for a 100%-volunteer food-rescue nonprofit coordinating 25+ weekly pickup/delivery routes, defining **10+ KPIs** spanning donations, distribution, and volunteer activity.
- Designed and deployed **Tableau** and **Power BI** dashboards sourced from **Snowflake**, consolidating data across 3 departments and streamlining donor and year-end reporting.
- Quantified organizational impact for donor and grant reporting (**100K+ lbs of food recovered**), while mentoring student teams on project scoping and analysis.
- Automated recurring reporting workflows, reducing manual effort by an estimated **30%**.

Walmart

Inbound Case Forecasting – Capstone Project

College Park, MD

Sep 2025 - Dec 2025

- Partnered with supply-chain stakeholders to gather requirements and scope forecasting needs for 7 departments across **1,000+ stores**, owning the full lifecycle from requirements through deployment.
- Built and validated statistical and **machine learning** forecasting models delivering a 5-week-ahead prediction at **6.3% MAPE** with near-zero bias.
- Built a **GenAI-enabled** analytics layer (**Google Gemini, FastAPI, Streamlit**) converting natural-language questions into structured forecasts through a self-serve, chatbot-style interface.
- Presented findings and recommendations to a cross-functional team of business stakeholders and engineers.

L&T Technology Services

Analyst

Bangalore, India

Jan 2024 - Jul 2024

- Analyzed patient scheduling data flows across legacy and modern hospital systems to identify integration gaps and data quality issues, partnering with a **5-member** cross-functional team.
- Performed data validation and reconciliation testing on automated data-transfer workflows (**Kafka, Postman, Eclipse**), ensuring accuracy across integrated systems.
- Designed data models (**star and snowflake schema**) and analyzed system performance to identify root causes of downtime, reducing downtime by **20%** and improving processing speed by **15%**.
- Documented data sources and processes, supporting collaboration between technical and non-technical stakeholders.

Raj Medicals

Business & Data Analyst

Bangalore, India

Aug 2021 - Dec 2023

- Analyzed 1,000+ pharmacy transactions across 200+ prescription and OTC drugs using **SQL** and **Excel**, comparing COVID-era vs. post-COVID sales trends.
- Uncovered a **30% seasonal spike** in flu medicine sales and a **40% decline** in immunity-booster sales, translating findings into data-driven stocking recommendations.
- Conducted recurring trend analysis across product categories, improving **inventory turnover by 12%** and reducing stockouts.
- Presented statistical findings and recommendations directly to ownership.

PROJECTS

Optimal Food & Beverage Site-Selection Analysis, Philadelphia | *Python, BERTopic, Tableau*

- Analyzed ~1,400 bar locations and 200,000+ Yelp reviews using **BERTopic** topic modeling and geospatial analysis, finding that venues offering specialized experiences consistently outperformed generic venues in ratings.
- Built an interactive **Tableau** dashboard combining Yelp and U.S. Census demographic data to map high-rating, low-competition opportunity zones for site selection.

Airbnb Perfect Rating Prediction Using XGBoost & NLP | *Python*

- Built a predictive **XGBoost** model in **Python** on structured and unstructured data (listings, reviews), engineering 85 features to achieve a **48.2% true positive rate**.
- Applied **NLP (TF-IDF, VADER)** to unstructured review text to enhance predictive performance and inform pricing and communication strategies.

LLM-Based Loan Description Classification & Process Automation | *Python, Google Gemini API*

- Applied prompt engineering using **Google Gemini** (gemini-2.0-flash) to classify unstructured loan descriptions, achieving **91% classification accuracy** against a manually labeled dataset.
- Built a scalable **Python**-based LLM pipeline with API integration and **JSON parsing**, reducing manual review effort by **~90%** while modeling cost/time tradeoffs to scale to **126,000+ records**.

EDUCATION

University of Maryland – M.S. Business Analytics

College Park, MD | Dec 2025

Vellore Institute of Technology – B.S. Computer Science and Engineering

Vellore, India | May 2024

SKILLS & COMPETENCIES

Languages & Scripting: SQL, Python, R, VBA

Machine Learning & AI: Machine Learning, XGBoost, NLP (TF-IDF, VADER, BERTopic), Generative AI, Prompt Engineering, Statistical Modeling, Forecasting

Data Engineering & Cloud: Snowflake, AWS, ETL/Data Pipeline Development, Data Modeling

BI & Visualization: Tableau, Power BI, Excel (Advanced)

Business & Collaboration: Requirements Gathering, Stakeholder Management, A/B Testing, Cross-Functional Collaboration, JIRA, Git
